G.L. Dulmina Hasith Gunasekara

Cybersecurity Enthusiast | Web Developer & UI/UX | NVQ Level 6 Information Technology

dulminahasith43@gmail.com | +94701540194 | Bandarawela, Sri Lanka | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Cybersecurity-focused IT student pursuing an NVQ Level 6 Higher National Diploma in Information Technology at SLAITE. Hands-on experience in network reconnaissance, vulnerability assessment, and security monitoring through practical labs and self-initiated projects. Skilled in Linux environments, penetration testing tools, and Python-based development. Seeking a cybersecurity internship to contribute technical skills in threat detection, analysis, and system security.

TECHNICAL SKILLS

Cybersecurity & Networking
Network Reconnaissance, Vulnerability Assessment, Basic Penetration Testing, Packet Analysis, Log Analysis, Threat Detection, TCP/IP, DNS, HTTP/S

Tools & Technologies
Nmap (network scanning & enumeration), Wireshark (packet analysis), Metasploit (exploitation basics), Burp Suite (web testing), Kali Linux (penetration testing), Linux CLI, SSH

Programming & Development
Python, Bash Scripting, Flask, bcrypt

Web & UI/UX
HTML, CSS, JavaScript, Responsive Web Design, UI/UX Principles

Operating Systems
Linux (Kali, Ubuntu, Mint), Windows, Android (Termux)

Other
Git, Docker (Basics), Database Management, Cloud Fundamentals

PROJECTS

SentinelX — Security Monitoring Dashboard (In Development)
Developing a real-time security monitoring dashboard to detect and visualize suspicious system and network activity. Designed as a self-initiated project to simulate a lightweight SIEM-like environment.

- Implementing log monitoring and event tracking using Python and Flask
- Building a responsive dashboard interface for real-time visualization
- Applying concepts of threat detection and security monitoring

Tools: Python, Flask, bcrypt, HTML, CSS, JavaScript
Link: https://github.com/GGdulmina/sentinelx

Hands-on Cybersecurity Labs (TryHackMe, Hack The Box, OverTheWire)
Completed practical cybersecurity labs covering Linux security, privilege escalation, networking, and basic exploitation techniques.

- Progressed through OverTheWire Bandit (Levels 0–12)
- Practiced command-line security operations and file system analysis
- Gained exposure to real-world attack and defense scenarios

Tools: Linux CLI, Bash, SSH, base64, xxd

Network Reconnaissance Lab

Conducted structured network scanning and service enumeration in a controlled lab environment.

- Performed host discovery and port scanning using Nmap
- Analyzed scan results to identify open services and potential vulnerabilities
- Documented findings and published results on GitHub

Technologies: Nmap, Linux Mint, Terminal
 GitHub: https://github.com/GGdulmina/networking-lab

EXPERIENCE

IT Lab Assistant | Sri Lanka Institute of Advanced Technological Education (SLAITE)
2023 – Present | Badulla, Sri Lanka

- Maintained and configured 30+ computer systems ensuring continuous lab availability
- Diagnosed and resolved hardware and software issues, reducing system downtime
- Assisted in basic network setup and troubleshooting for lab environments
- Supported students and staff with technical issues and system usage

IT Lab Assistant | B/Dharmapala Maha Vidyalaya
2019 – 2022 | Bandarawela, Sri Lanka

- Supported daily IT lab operations and maintained computer systems
- Assisted students during ICT practical sessions and troubleshooting tasks
- Managed lab equipment and ensured proper system functionality

Higher National Diploma in Information Technology (NVQ Level 6)
Sri Lanka Institute of Advanced Technological Education (SLAITE)
2nd Year | Expected Graduation: 2028
Relevant Modules: Networking & Data Communications, Operating Systems, Database Management, Web Technologies, Cloud Computing Fundamentals, Programming & Software Development

G.C.E. Advanced Level — Engineering Technology Stream (ICT)
B/Dharmapala Maha Vidyalaya
2022

CERTIFICATIONS

- **IBM Cybersecurity Analyst Professional Certificate** | IBM / Coursera *[In Progress]*

ADDITIONAL INFORMATION

- Actively practicing cybersecurity through labs and self-learning platforms
- Strong interest in Security Operations Center (SOC) roles and penetration testing
- Passionate about building security tools and learning real-world defense techniques
